Roshan Choudhury

General Manager (Systems) at National Aluminium Company
(NALCO), India
Bhubaneswar, Odisha, India

Summary

I am a dedicated, experienced and innovative IT professional working in a Navratna company in the areas of SAP ERP implementation, software application development using Power Builder, VB-6, VB.NET, ASP, ASP.NET as the front-end development environment and Sybase, MS SQL and MS Access as the backend RDBMS. I also actively perform the system administration and maintenance activities of Windows 200x server infrastructure, Lotus Domino Enterprise server environment, Citrix Metaframe XP application server infrastructure along with thin client devices and Trend Micro Corporate Edition security solution.

Currently I am working on the SAP ERP implementation project as IT core team member.

I managed the installation and setup of the newly constructed state-of-the-art data center for my company within the record time period of six months. Subsequently I am managing the regular maintenance activities of the data center with a achieved target uptime of 99.9 percentage.

I am also working as a SAP ABAP developer and performing activities related legacy data transportation to SAP environment.

Specialties: Power Builder, VB, VB.NET, ASP.NET, Sybase, MS SQL and SAP ABAP
